Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The amendment of 11/12/02 has been entered. Claims 1-11 and 14-16 are pending.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-7, 9-11, and 14-16 are rejected under 35 U.S.C. 102(b) as being anticipated by

US Pat. No. 5958609 Ueda et al..

Ueda et al. discloses the instantly claimed composition at column 14, lines 20-47 and the remainder of the document. Lower polymer molecular weights and higher solvent amounts will necessarily inherently give the instantly claimed viscosities by definition of intrinsic viscosity and inherent viscosity.

5. Claims 1-11 and 14-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Pat. No. 5958609 Ueda et al..

Art Unit: 1714

Ueda et al. discloses the instantly claimed composition at column 14, lines 20-47 and the remainder of the document. Lower polymer molecular weights and higher solvent amounts will necessarily inherently give the instantly claimed viscosities by definition of intrinsic viscosity and inherent viscosity. It would have been obvious to one of ordinary skill in the art at the time of the instant invention to use the instantly claimed mixture of ingredients to give the instantly claimed viscosities because they are encompassed by the patentee's disclosure and would have been expected to give predictable film properties to the ordinary skilled artisan. It would have been obvious to one of ordinary skill in the art at the time of the instant invention to use the solvents of the instant claim 8 in the composition of the patentee because they are of similar hydrophile/lipophile balance and vapor pressures as those of the patentee and therefore would have been expected to function similarly as the solvents of the patentee and they are encompassed by the patentee's recitation of "and the like".
